## Education

**Dr. A. P. J. Abdul Kalam Technical University, Lucknow**  
*Bachelor of Technology in Computer Science and Engineering*

*Sept 2018 – Oct 2022*

## Experience

**Web Development Intern — Way2Agribusiness India Pvt. Ltd., Bengaluru**

*April 2025 – Present*

- Built and deployed two agri-tech platforms: [karnatakaagribusiness.com](#) and [way2foods.in](#).
- Developed full-stack, role-based dashboards using **Next.js**, **Node.js**, **Express.js**, **MongoDB**, **Tailwind CSS**.
- Implemented JWT auth, protected routes, and RESTful APIs with role-based access for Admins, Buyers, APMCs, and FPOs.
- Integrated Cloudinary (image upload), Multer (file handling), Nodemailer (emails), and Chart.js (data viz).
- Configured production deployment on DigitalOcean with NGINX reverse proxy, PM2 process manager, and SSL setup.
- Delivered responsive, mobile-first UI and collaborated using Git + Agile development workflow.

## Projects

**Way2Foods — Role-Based Agri-Commerce Platform** *Next.js, Node.js, MongoDB, Tailwind CSS, JWT*

*live project*

- Designed and built a full-stack production platform with secure dashboards for Buyers, FPOs, APMCs, and Admins.
- Developed backend APIs using Next.js API routes with JWT authentication and middleware-based role protection.
- Built admin features for vendor/product approvals, analytics (sales, AOV, top products), and user management.
- Implemented vendor tools (FPO/APMC) for product lifecycle management, revenue tracking, and real-time metrics.
- Created buyer dashboard for order history, profile updates, and responsive UI optimized for mobile.
- Deployed on DigitalOcean with NGINX reverse proxy, PM2, and manual SSL configuration for production readiness.

**Karnataka Agribusiness — B2B Role-Based AgriTech Platform** *MERN Stack • Tailwind CSS*

*live project*

• *JWT • Chart.js*

- Built a full-stack, production-ready B2B platform connecting Vendors, Buyers, and Admins via role-based dashboards.
- Developed Admin Panel to manage users/vendors, approve listings, track analytics, and control access.
- Implemented JWT-secured APIs and middleware-protected routes for scoped dashboard functionality.
- Created Vendor Portal for product CRUD, profile management, and live performance tracking.
- Enabled buyers to browse vendor products, send inquiries, and manage profiles via a mobile-first UI.
- Deployed on DigitalOcean with NGINX reverse proxy, PM2 process manager, and manual SSL setup.

**Personal Portfolio — Dev Journey & Showcase Site** *Next.js • TypeScript • Tailwind CSS •*

*live project*

*Framer Motion*

- Developed a sleek, modern portfolio to showcase my skills, projects, experience, and developer journey.
- Built with Next.js App Router and TypeScript, featuring modular components and type-safe architecture.
- Designed a black-and-white Vercel-inspired UI with full dark mode support and smooth Framer Motion animations.
- Optimized for performance, mobile-responsiveness, and SEO; deployed via Vercel with custom metadata.

**Quiman — E-Commerce UI** *React.js, Tailwind CSS, Framer Motion, Lottie*

*live project*

- Designed a visually appealing responsive e-commerce interface with category pages and product filtering.
- Used Lottie, Framer Motion, and Swiper to deliver smooth animations, transitions, and error pages.

## Technical Skills

**Languages:** JavaScript, TypeScript, Python

**Frontend:** Next.js (App Router), React.js, Tailwind CSS, Shadcn UI, Framer Motion, Chart.js, SWR

**Backend:** Node.js, Express.js, REST APIs, JWT, bcryptjs, Multer, Nodemailer, Cloudinary, Slugify

**Databases:** MongoDB, Mongoose

**Version Control & Deployment:** Git, GitHub, Vercel, DigitalOcean, NGINX, PM2, Manual SSL

**UI/UX & Other Tools:** Figma, React Icons, Toastify, CountUp, Moment.js, SEO Optimization

## Certifications

**100 Days of Python Certification – Udemy:** Mastered Python by completing 100 projects in 100 days, focusing on data science, web automation, website development, game development, and app creation.

**React & Redux Certification – Udemy:** Gained expertise in React.js and Redux by applying modern design patterns to build applications using React Router, Tailwind CSS, Context API, and Hooks.

## Contributions

Contributing to 100+ Vanilla JavaScript projects focused on small, functional web applications using HTML, CSS, and JavaScript.
